POST TEST 1.1

### POST TEST 1.2

POST TEST 2

POST TEST 3

LONG QUIZ FRONT

LONG QUIZ BACK

PRE TEST 1

PRETEST1 ADVANCE HCI

Total points 7/15 ?

Instructions: Answer the following **10 challenging questions** to assess your knowledge of **Advanced Human-Computer Interaction (HCI)** concepts.

The respondent's email (sc.ma.lyn.cabugayan@cvsu.edu.ph) was recorded on submission of this form.

PRE TEST 2

PRE-TEST2 User-Centered Design & Research Methods

Total points 7/15 ?

Answer the following questions to the best of your ability. This pre-test will help evaluate your understanding of **User-Centered Design (UCD) and Research Methods**.

The respondent's email (sc.ma.lyn.cabugayan@cvsu.edu.ph) was recorded on submission of this form.

PRE TEST 3

PRETEST3- Usability Principles & Heuristic Evaluation

Total points 10/15 ?

Instructions: Answer the following **10 challenging questions** to assess your understanding of **Usability Principles & Heuristic Evaluation**.

The respondent's email (sc.ma.lyn.cabugayan@cvsu.edu.ph) was recorded on submission of this form.

PRE TEST 4

PRE-TEST4 - Interaction Design & Prototyping

Total points 7/15 ?

Instructions: Answer the following **10 challenging questions** to assess your knowledge of **Interaction Design & Prototyping**.

The respondent's email (sc.ma.lyn.cabugayan@cvsu.edu.ph) was recorded on submission of this form.

PRE TEST 5

Pre-Test 5

Total points 12/20 ?

Answer the following questions to the best of your ability. This test is designed to measure your initial understanding of Information Architecture (IA) and Navigation Design concepts.

Reflection Paper

This reflection encapsulates the most important things learned during a web development activity. The writer had hands-on experience writing a multi-page website with semantic HTML, doing proper navigation, and styling for different pages.

They also gained experience with responsive design methods like hamburger menus and grids, and using external libraries like Font Awesome and Google Fonts to make usability better. One of the most important things learned was how to structure content properly by classifying work into quizzes and projects, and visual hierarchy management through CSS styling.

They also enhanced their problem-solving capabilities in debugging such issues as broken links, inconsistencies in styling, and responsive usability issues. Lastly, the author acknowledged the need to showcase their portfolio professionally so live demonstrations and repositories of their work are available. They also highlighted the necessity for iteration and attention to detail in streamlining technical products for ease of use and systemic design, which enhanced both their technical skills and grit.
